

# STC Europe USB Music Box

USB Music Box is a mountable music connection with charging function.

- Plug in your USB device and stored music can be listened to via the AUX channel.
- Cable with USB socket can be placed out-of-sight in glove compartment, centre console or armrest
- Provides also a very high sound improvement on existing AUX connection, same level as radio output
- CAN-bus interface provides selection of songs or albums through steering wheel remote control
